

 **BELTANE**
STOVES

Quality with affordability is key – that's where Beltane Stoves come in.

As a Somerset based family business passionate about stoves, we know how important deciding on the right one for you is. We are justifiably proud of our Beltane Range.

We want our customers to benefit from the same things we experience and which only great quality stoves can bring – cosiness, warmth, a great fire view and a burn that lasts.

Manufactured with classic lines & solid construction using materials more often found in higher priced stoves, the Beltane Range is a great all round choice.

Since their introduction, they have proven exceptionally popular, had consistently good customer ratings and shown the sort of excellent durability we would expect.

Beltane Stoves offer a great way to add a stove to your home, which as a room feature in its own right, can be enjoyed and admired year round.

Have a look at our range and see what's right for you.

STYLE

The aim is simple, classic and solid - with tough 5mm steel construction, that's what the Beltane Range delivers.

It means our stoves look great in any environment but do especially well in the modern home or anywhere, where elegance and simplicity is the aim.

MULTI-FUEL VERSATILITY

Beltane Stoves incorporate modern combustion technology, meaning stoves are easy to light and fully adjust to allow you to have your fire just the way you want it.

A woodburning and multifuel stove brings a satisfying warmth to your home.

All stoves are designed for both wood and smokeless fuels depending on what you prefer. The versatility means you can even mix fuels if that's what you want.

BUILD QUALITY & DESIGN

Beltane Stoves have design features more often found in more expensive ranges.

Every stove is manufactured from painted 5mm steel with silvered handles to add a splash of contrast. All grates are durable cast iron.

Every stove is vermiculite lined for efficiency and effectiveness. Vermiculite consistently outperforms other less expensive materials and remains the main material of choice in quality stoves.

Each stove is fitted with an effective 'air wash system' reducing deposits on the ceramic glass. That means less cleaning and more enjoyment.

Additionally; Beltane Stoves' large glass gives an impressive fire view creating a cosy ambiance that all can enjoy.

ENVIRONMENTALLY SOUND

Now more than ever we all want to do our bit to protect the environment.

'Ecodesign Ready' is the European-wide programme to lower emissions in woodburning and multifuel stoves, due in 2022.

Beltane Stoves already meet this demanding standard, so you can be comfortable that your new stove is one of the cleanest burning available.

ICONOGRAPHY

Eco Design

Ecodesign Ready stores are designed to reduce PM emissions.

SMOKE
EXEMPT

Defra Approved Appliance

These stoves are suitable for burning wood and smokeless fuels in smoke control areas

BELTANE BRUE

NEW FOR 2020

The Brue now comes with a new door design and larger glass giving it a better fire view than most in its class. It is the most compact in the Beltane Range making it especially ideal for modern room sizes.

Nothing differs on quality though – the Brue meets the excellent standards of others in the range as well as sharing their classic, solid looks. It's also now available as a logstore model.

BELTANE BRUE LOGSTORE

Key Features:

- Great for smaller spaces
- Easy to use air controls
- Output Range from 3 - 5 kW
- Optional Logstore
- Vermiculite lined
- Cast iron grate
- British Design
- Suitable for 12mm glass floor plate
- A+ Energy Rated
- Defra Approved
- Ecodesign Ready

BELTANE CHEW

NEW FOR 2020

The Chew packs a bigger punch than the Brue with larger dimensions, higher output and the ability to burn logs up to 35cm. Bigger glass delivers an even better fire view.

As a 'classic' stove it can still be fitted onto 12mm glass plate free standing or set into a squared out existing fire space. Either way its good looks won't disappoint.

Key Features:

- Ideal for bigger spaces
- Easy to use air controls
- Output Range from 4 - 6 kW
- Vermiculite lined
- Cast iron grate
- British Design
- Suitable for 12mm glass floor plate
- A+ Energy Rated
- Defra Approved
- Ecodesign Ready

BELTANE HOLFORD

For those with an existing 16 inch fireplace the Holford provides a beautiful, contemporary addition to a room all year round.

The Holfords ‘portrait’ design can be set back snugly to sit flush with the wall and is available with either a three or four sided frame, meaning it can sit on the level of the hearth or raised to give an even more modern look.

- Defra Approved

BELTANE HOLFORD

LANDSCAPE

NEW FOR 2020

The new Holford Landscape offers a fantastic wide screen view of your fire. Its sleek simple lines combine to give an elegant feel especially when integrated into existing fireplace surrounds.

Available with a four sided frame, this excellent stove is versatile to help create different looks depending on the ambiance you want to create, whether fitting within a fireplace or into an existing chimneybreast.

Key Features:

- Landscape Inset Stove
- Easy to use air controls
- Output Range from 4 - 7 kW
- Vermiculite lined
- Cast iron grate
- Suitable for 12mm glass floor plate
- A+ Energy Rated
- Defra Approved
- Ecodesign Ready
- Closed Combustion 100mm ø

Guaranteed performance

Of course you can buy with confidence. Beltane Stoves are covered by a 2-year guarantee against manufacturing defects.

This covers the main body of the stove but you can be comforted to know that we carry a range of spares in case of accidental damage to replaceable parts like glass, firebricks and seals.

You can look forward to enjoying your Beltane Stove for many years to come.

(N.B Beltane Stoves have a policy of continuous improvement and reserves the right to change specification without prior notice).
